

Rainbow™ Model 300/320

Automatic Chlorine/Bromine Feeders

By Pentair Water Pool and Spa™

The efficient, easy way to sanitize your pool or spa

The Rainbow™ models 300 and 320 automatic chlorine/bromine feeders not only save time, but also reduce manual handling of chemicals. They use large or small Trichlor or Bromine slow-dissolving tablets to make sanitizing your new or existing pool or spa easy and automatic. Both install easily on the pressure side of the pump, downstream of the filter and heater.

The freestanding Model 300 and the in-line Model 320 both feature an external fine control valve that lets you adjust the feed rate to meet specific pool or spa requirements. The 300 is ideal for retrofitting existing pools for automatic sanitization. The 320 is designed for permanent installation in the return line of new or existing systems, and dispenses sanitizer directly into your pool or spa, downstream of all equipment.

- Completely enclosed systems—no escaping fumes.
- Simple, troublefree designs—no special venting required.
- Top-loading makes it easy to add chemicals. Also available in clear amber for easy tablet viewing.

Feeder extensions increase tablet or stick capacity so you can vacation without worrying about running out of chlorine.

Rainbow™ Model 300/320

Automatic Chlorine/Bromine Feeders

Flow indicator allows a quick visual read of water flow

Check valve protects pump and heater against damage from back-up of highly chlorinated water

Save time, reduce manual handling of chemicals

Whether you choose the free-standing Model 300 or the in-line Model 320, Rainbow™ automatic chlorine/bromine feeders will take the work and worry out of keeping your pool sparkling clean and ready to use.
